

## Recording Voice with Odeo Studio

Odeo Studio is a web-based audio recording tool, basically intended for those interested in creating podcasts or recording audio for blogs. You need to have a microphone or headset (the kind with a pink plug that fits into any computer) and you need to have Macromedia Flash installed on the computer you are using. You also need to create an Odeo log-in with an email address and an Odeo password of your choosing. You will also need speakers, headphones, or a headset in order to hear what you have recorded.

Getting started:

1. Go to <http://studio.odeo.com>
2. Click on the large green button 'SIGN UP NOW'
3. Create a user name, type in your email address, and create a password for Odeo (not your email password) and click 'SIGN UP NOW' again
4. Click on the pink words or record button 'RECORD NEW AUDIO'

**Record New Audio**  
Record your voice right now with Odeo Studio, our free browser-based recorder.

5. If you see this puzzle piece, you need to install Macromedia Flash (don't worry, it's free)

Click here to get the plugin

6. You may have to give permission for camera/microphone access on this pop-up

7. Click on RECORD to record your voice. Click on STOP when you are finished. Click on PLAY to hear what you have recorded. It's easy!
8. Click on the pink button SAVE RECORDING
9. It will take you to a page that looks like this
10. .flv files aren't very compatible, so click on TRY ODEO/PLAY (circled on the right)
11. From the bottom of this screen, you can easily save the file as an MP3.
